Software Engineering Project Phase 2 Requirements

Phase 2: **Implementation**

Each team should deliver the following requirements for the assigned project idea:

1- Create the tables and stored procedures required for your project and Keep their script in a word

2- There must be 2 different forms using ODP.Net with different functionalities depending on the project idea and 2 different Crystal reports

A. ***Using ODP.Net connected mode:***

1. Select rows from DB using bind variables and command parameters
2. Insert rows (**Without** using Procedures)
3. Select ONE row from DB using stored Procedures (**Without** using SysRefCursor) [use out parameters of **Number** data type]
4. Select multiple rows from DB using stored procedures.

B. ***Using ODP.Net Disconnected mode:***

1. Select certain rows for a given value entered by the user on the form
2. Update using oracle command builder

C. ***Using crystal reports to create reports with:***

1. Grouped columns
2. Summarized columns (**Use both** Formula and Summary fields)
3. Parameters
4. Calling reports from C#

D. ***GUI:***

There should be a main form containing menus to open all forms and reports of the project

Delivery Instructions:

- Delivery Deadline will be on **Friday 1 May 2026** at 11:59 PM.
- Each team should submit the required task as a **ZIP** file that includes:
  1. Visual Studio Project Folder
  2. Script of the Created Tables and Stored Procedures in a Word File
  3. A cover page with the following details (Project Name, Assigned TA Name, Team ID, Team Members' names in Arabic, Seat numbers, Department)
- Team leader should submit the Zip file to the submission form in the below link, and the name of the Zip file should be written as follows:

[Mainstream/CHP]_[Team ID]_[Project Title].zip
